Web-based Knowledge Management System Helps Schools Lower Costs and Satisfy Complex State & Federal Reporting Mandates

Contemporary Computer Services, Inc files patent application prepared by Scully, Scott, Murphy & Presser

Garden City, NY -- Contemporary Computer Services, Inc. (CCSI), a technology integrator and service provider, and Scully, Scott, Murphy & Presser, a leading Intellectual Property Law firm, have announced that a patent application has been prepared and filed for a Web-based knowledge management system for schools and school districts. The system, known as eSchoolData®, comprises technology for maintaining students' profile information -- including household, attendance, health, discipline, and academic performance data from the Kindergarten through 12th grade school lifecycle. Its key innovations are its ability to link, integrate, and output data to enable teachers and administrators to carry out their educational, fiduciary, and administrative responsibilities more efficiently -- thus greatly improving productivity, and greatly simplifying compliance with schools' complex federal and state mandated reporting requirements.

"We did a great deal of research before developing the technology for eSchoolData," said John Riconda, CEO and president of CCSI. "The eSchoolData system was further enhanced after being implemented in 10 local school districts. Because the 2002-2003 pilot implementations were so successful, we are planning a full market rollout of the product in 2004."

"The CCSI patent filing is typical of the advanced technology patent work that we do at the firm," said Paul Esatto, Senior Partner at Scully, Scott, Murphy & Presser. "This patent application is particularly interesting because it uses the new Application Service Provider (ASP) software model to deliver services that immediately provide great benefits to the schools."

About Contemporary Computer Services, Inc.

Founded in 1974, Contemporary Computer Services, Inc. (CCSI) is a full-service technology integrator and service provider -- partnering with industry leaders such as Cisco Systems, Microsoft, HP, Oracle, IBM, and Compaq.
