Scully, Scott, Murphy & Presser Presents 2nd Annual Innovation Award

Stony Brook University Undergraduate Team to Receive Patent Application

Garden City, NY -- Scully, Scott, Murphy & Presser, a leading Intellectual Property Law firm, has announced the presentation of their 2nd annual Innovation Award -- in coordination with the Stony Brook University Office of Technology Licensing and not-for-profit Assistive Play Technologies, Inc. (APT). The award was given to the Stony Brook University undergraduate engineering team with the best senior design project for a disabled children's assistive device. Scully Scott presented the award at Stony Brook University's commencement ceremony and will, on a pro bono basis, prepare, file and prosecute a patent application for the winning project.

The winning Stony Brook University undergraduate engineering team was Richard Murray and Yohann Littee for their invention "Compact Wheelchair Lift."

"The winning students have invented a unique portable wheel chair lift for the disabled," said Steve Fischman, patent attorney with Scully Scott. "It has a small footprint and solves the problem of building access and logistics for wheelchair bound individuals. It can be quickly set up to provide vertical lift onto a stage or passage up or down a short flight of stairs."

"We're very pleased to have presented our second annual Innovation Award to a worthy engineering student team at Stony Brook University," said Paul Esatto, Senior Partner at Scully, Scott, Murphy & Presser. "By recognizing their achievement, we hope to incentivize others to follow in their footsteps. At the same time, our award teaches the engineering students about the patent application process and helps disabled children."

"The Scully, Scott, Murphy & Presser Innovation Award helps to publicize that our university research often yields commercially valuable intellectual property," said Jack Petersen, Director of the Stony Brook University Office of Technology Licensing. "As the leading campus for research in the SUNY system, our efforts to commercialize research have included license agreements with over 300 startup companies and other varied stage companies."

"The Innovation Award recognizes the efforts of young engineers and brings joy to special children," said Judy Hayward, founder of APT. "With Scully Scott's award, we hope to attract the attention of manufacturers who can make these innovations more broadly available to a very worthy audience."

The Stony Brook University senior design program provides opportunities for senior engineering students to develop custom-made prototype devices to improve the quality of life for severely disabled children. The program centers on a systematic approach to engineering design called "Total Design." This approach requires the students to interact directly with their clients in order to develop the product design specifications -- based on the specific physical limitations of a physically challenged child -- and then carry out the design tasks systematically. The program was conceived by Judy and James Hayward, founders of APT.

About Scully, Scott, Murphy & Presser

Founded in 1973, Garden City-based Scully, Scott, Murphy & Presser is one of Long Island's largest and most preeminent law firms exclusively dedicated to Intellectual Property. Comprised of highly skilled attorneys with highly technical backgrounds, SSMP confidently sits at the crossroads of cutting edge science, technology and law where it offers detailed, bankable opinions and secures, protects and enforces intellectual property for its clients. For more information, visit Web site <http://www.ssmp.com>.

About Stony Brook University

Established in 1957, Stony Brook University is one of the leading public research institutions in the nation. Its renowned graduate and undergraduate programs include the humanities, arts and sciences, and engineering and applied sciences. Internationally known faculty members teach courses in more than 100 programs to 22,000 students. Stony Brook's Health Sciences Center trains undergraduate and graduate students for careers in healthcare and Stony Brook University Hospital is the tertiary care facility for Suffolk County's 1.7 million residents. Last year, Stony Brook University expanded into New York City with a new state-of-the-art Manhattan facility. Stony Brook University is a NCAA Division I school and a member of the invitation-only organization of top research universities, the Association of American Universities (AAU).

About Assistive Play Technologies

Established in 1998, Assistive Play Technologies, Inc was initially funded by the employees of The Collaborative Group, Ltd. APT's goal is to enable play for physically challenged children. In addition to collaborating with Stony Brook University on device engineering, APT is developing a toy-lending library to service the local community. Contact APT for more information at 631-632-9014.
